DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Sept. 24, 2003 has been entered.

Claims Status

2. Claims 1-6, 8-11 and 13-16 are pending in the instant application. Claims 6 and 11 have been amended as requested by Applicant in the Paper filed Sept. 24, 2003.

Withdrawn Rejections

3. The rejections of claims under 35 U.S.C. 102 and 103 are withdrawn in view of Applicants' amendment.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 6, 8-11 and 13-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-11 of U.S. Patent No. 6,475,984. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both encompass methods of administering leptin to a premature infant.

Claims 1-4, 6, 8-11 and 13-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 34 of copending Application No. 10/286,947. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 34 of copending Application No. 10/286,947 encompasses providing leptin to a subject requiring leptin therapy to treat a condition by administering milk fat globules containing about 50ng/ml to 100 ng/ml of leptin, and claims 1-4, 6, 8-11 and 13-16 of the instant application encompass administering to individuals with respiratory problems leptin at similar concentrations.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim 5 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-11 of U.S. Patent No. 6,475,984 in view of Pelleymounter et al., Science, Vol. 269, No. 5223, 1995, pages 540-543. It would have been *prima facie* obvious to supplement to supplement the milk fat globules with the recombinant

leptin (obese gene product) of Pelleymounter et al., in order to increase the administered dose of leptin.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-4, 6, 8-11 and 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-4, 6, 8-11 and 13-16 are vague and indefinite because they encompass treatment with a “leptin compound”, and it is not clear what is meant by that term, and how a “leptin compound” would differ from leptin (or a biologically active fragment of leptin). It is suggested that in claims 1, 5, 6, 9, 11, and 14 “a leptin compound” or “the leptin compound” be replaced with – leptin or a biologically active fragment thereof – and claims 4, 10 and 15 be canceled. It is also suggested that claims 8, 13 and 16 be amended as follows:

--The method of claim _ wherein the step of administration includes administering to the individual milk fat globules containing leptin or a biologically active fragment thereof. --

Conclusion

5. No claim is allowed.
